☐ Implement general UI and basic constructs to be as simplistic as possible and without complexity.
a. Assigned: Lee and Paxton
b. Technical Description: The engineering constructs of the application. We intend for our software to be simplistic and easy to use so that anyone of any technological knowledge level may use this software to their advantage.
c. Difficulty: Easy

☐ Build the initial text editor section .
a. Assigned: Samantha
b. Technical Description: The core function of the application. Needs to allow the user to create and edit text documents, and folders to store them in.
c. Difficulty: Medium

☐ Apply autosave feature to the application
a. Assigned: Eric
b. Technical Description: Allow created documents to save automatically after a single character is added or erased that way no data is lost if the application were to freeze, your PC would run out of battery, you close the application by accident, etc.
c. Difficulty: Medium

☐ Apply Async Storage .
a. Assigned: Samantha
b. Technical Description: Allows the text documents to persist when the application is closed and re-opened
c. Difficulty: Easy
